

Module -4

1. What are the main factors that can affect PPC bidding?

1. Quality Score

Your ad quality influences how much you pay:

- Expected CTR
- Ad relevance
- Landing page experience

Higher Quality Score = lower CPC + better ad placements.

2. Keyword Competition

When many advertisers bid on the same keyword:

- CPC increases
When fewer advertisers bid:
 - CPC decreases

Highly competitive industries (insurance, finance, travel) have higher bids.

3. Bidding Strategy

Your chosen strategy affects your bid level:

- Manual CPC
- Maximize Clicks
- Target CPA
- Target ROAS
- Maximize Conversions

Automated bidding adjusts based on algorithmic predictions.

4. Audience Targeting

Narrow or highly valuable audiences cost more:

- Remarketing
- High-intent custom segments
- Demographic targeting

More specific = higher CPC.

5. Device & Location

CPC varies by:

- **Device (mobile clicks are often cheaper)**
- **Location (metros = higher bids)**
- **Time zone and local market value**

Example: Cities like Mumbai, Delhi have higher CPCs vs tier-2 cities.

6. Ad Rank of Competitors

If competitors have:

- **Better Quality Score**
- **Higher bids**
- **Stronger ads**

... your required bid rises to stay competitive.

7. Seasonality

Prices fluctuate during high-demand periods:

- **Festive season**

- Weekend spikes
- Special events (Diwali, Christmas, Black Friday)

Demand ↑ → CPC ↑.

8. Daily Budget & Ad Schedule

Low daily budget:

- Google raises CPC to use budget faster
- Ad schedule:
- Higher CPC during peak hours
-

9. Industry & Keyword Intent

Commercial intent keywords cost more:

- “Buy iPhone online” = high CPC
- “iPhone review” = low CPC

Transactional keywords are always expensive.

10. Ad Format & Extensions

Better ad formats improve CTR, reducing CPC:

- **Sitelinks**
- **Callouts**
- **Structured snippets**
- **Price extensions**

Higher CTR → Better Quality Score → Lower bids.

Summary (Quick List)

- **Quality Score**
- **Competition**
- **Bidding Strategy**
- **Audience Targeting**
- **Device/Location**
- **Competitors' Ad Rank**
- **Seasonality**
- **Budget & Scheduling**

- Keyword Intent
 - Ad Extensions
-

If you want, I can also generate:

- a PPC bidding checklist
- an SEO-friendly blog section
- a PPC campaign framework

2. How does a search engine calculate actual CPC?

The Actual CPC you pay is *not* the same as your maximum bid.

The formula is:

★ Actual CPC = (Ad Rank of the competitor below you ÷ Your Quality Score) + ₹0.01

This formula ensures:

- You pay just enough to beat the advertiser below you.
 - Better Quality Score = lower actual CPC.
-

Step-by-Step Explanation

1. Ads enter the auction

Each advertiser has:

- A Max CPC bid
- A Quality Score (QS)

2. Search engine calculates Ad Rank

Ad Rank = Max CPC × Quality Score

Higher Ad Rank = better ad position.

3. Actual CPC is determined

You pay just enough to maintain your position above the competitor below you.

Example to Understand Actual CPC

Advertiser	Max CPC	Quality Score	Ad Rank (Max CPC × QS)
A (You)	₹40	10	400
B	₹50	6	300
C	₹30	5	150

You are in Position #1

The advertiser below you is B (Ad Rank = 300).

So your Actual CPC =

$$\gt 300 \div 10 + 0.01 = ₹30.01$$

Even though your max bid is ₹40,
you pay only ₹30.01!

Why Search Engines Use This System

- ✓ Rewards higher Quality Score
 - ✓ Encourages advertisers to create relevant ads
 - ✓ Ensures users get the best results
 - ✓ Prevents unnecessary high bidding wars
-

Key Takeaway

You don't pay your maximum bid.

You pay just enough to beat the advertiser below you.

If you want, I can also explain:

- ✓ Ad Rank
- ✓ Bidding strategies
- ✓ How to reduce CPC

3 What is a quality score and why it is important for Ads?

Quality Score is a metric used by search engines (like Google Ads) to measure the overall quality and relevance of your keywords, ads, and landing pages.

It is rated on a scale of 1 to 10, where 10 is excellent and 1 is poor.

Quality Score is based on three key components:

- 1. Expected CTR (Click-Through Rate)**
 - 2. Ad Relevance**
 - 3. Landing Page Experience**
-

★ Why is Quality Score Important for Ads?

Quality Score directly affects how your ads perform and how much you pay.

✓ 1. Lower CPC (Cost Per Click)

**Higher Quality Score = you pay less for each click.
Google rewards relevant ads.**

✓ 2. Better Ad Position (Higher Ad Rank)

With a strong Quality Score, your ads can appear:

- Higher on the page**

- In more competitive search results
Even if your bids are lower than competitors.
-

3. Higher ROI

Because you pay less and rank higher, you get:

- More clicks
 - Better performance
 - More conversions
-

4. Better User Experience

Google favors ads that provide:

- Relevant information
 - Useful landing pages
 - Good experience
This helps users get what they're searching for.
-

5. Helps Beat Competitors

**Even if competitors bid higher,
a better Quality Score can still outrank them and reduce your
cost.**

Quick Summary

Quality Score = Expected CTR + Ad Relevance + Landing Page Experience

High Quality Score gives you:

- ✓ Lower CPC
- ✓ Better ad ranking
- ✓ Higher conversions
- ✓ Better overall ad performance

If you want, I can also create:

- 📌 A short exam-ready version
- 📌 A one-line definition
- 📌 A diagram-style explanation

4. Create an ad for your website/ blog in Google Ads that display on the display network with the properly targeted audience .

The screenshot shows a sidebar navigation menu for campaigns. On the left, there are six main categories: 'Campaigns' (selected), 'Goals', 'Tools', 'Billing', and 'Admin'. Each category has an icon above its name. To the right of the sidebar is a large white box containing a tree-like navigation structure. The root node is 'Campaigns', which branches into 'Experiments' and 'Campaign groups'. 'Campaign groups' further branches into 'Audiences, keywords, and content'. There are also two downward-pointing arrows indicating more content below.

What's your campaign objective?

The screenshot shows a list of campaign objectives. At the top, a header says 'Choose your objective' and a sub-instruction says 'Select an objective to tailor your experience to the goals and settings that will work best for your campaign'. Below this are six objective cards, each with an icon, a title, a brief description, and a blue circular checkbox. The 'Leads' card is selected, indicated by a blue border around its box and a checked checkbox. The other five cards are: 'Sales', 'Website traffic', 'App promotion', 'Awareness and consideration', and 'Local store visits and promotions'.

Choose your objective

Select an objective to tailor your experience to the goals and settings that will work best for your campaign

Sales
Drive sales online, in app, by phone, or in store

Leads
Get leads and other conversions by encouraging customers to take action

Website traffic
Get the right people to visit your website

App promotion
Get more installs, engagement and pre-registration for your app

Awareness and consideration
Reach a broad audience and build interest in your products or brand

Local store visits and promotions
Drive visits to local stores, including restaurants and dealerships.
